## Remôtsy

## Setup

The steps to setup the Remotsy infrared board.

## **Remotsy Setup**

1.- Power on the Remotsy using any micro USB power supply, is recommended 1 Amp of output or more.

2.- Wait for the led to blink in green, this indicate that Remotsy is in setup mode

3.- Using any smartphone table or PC, search for the Wi-Fi network "Remosty\_Setup", for example in this case is using an Android phone.

4.- When the smartphone, table or PC is connected to the Wi-Fi network, open any browser, the browser will redirect you to the setup page.

Note: In some cases, the redirect doesn't work, in this case, please go to the URL <u>http://192.168.4.1</u>

<u>Scan</u>

6.- Save the Wi-Fi settings, if the board is connected to internet the led will change a light blue color, if after 30 seconds the LED is still flashing in green. Please press the reset button ONE time and wait for the blue light or the flashing green light. If the light is green please repeat the process to setup the Wi-Fi settings.

7.- If the LED light is light blue. Go to <u>https://www.remotsy.com</u> to create or login your account.

Note: if you have any problem please sent an email to <a href="mailto:support@remotsy.com">support@remotsy.com</a>
